RE: Reconstruction of Hwy 91 St. X to Pryor Rd.
February 3, 2025

Good Day. I have received your request regarding comments on Hwy 91 between St. X and Pryor MT.

Due to the severe deterioration of Hwy 91 it is difficult to respond to emergencies in a timely manner. Delays due to poor road condition contribute to delays in responding emergently to 911's, emergency calls for help. I have traveled over this road for the last 35 years and have seen how this road has become increasingly unsafe. The infrastructure of the road is poor and in disrepair. There are multiple places where there are holes, no shoulder, poor fencing, sunken area's and raised areas of the road.

By reconstructing this road it would improve Emergency Medical response to the individuals who live in the area and the people who travel Hwy 91 for many reasons such as tourism, route to home, visit relatives, etc.

Thank you for your time.

Respectfully,

Patti R Medicinehorse
Director
